## 1. Link

This link include the frontend as the backend code.

<https://github.com/JelleCeulemans1997/Amsterdam> (master branch, frontend and backend)

<https://github.com/JelleCeulemans1997/Amsterdam/tree/master/backend> (backend)

## 2. Getting started

Download the project via the Github website or use the link below. Don't forget the "git clone" command in front of the link below in your git bash.

<https://github.com/JelleCeulemans1997/Amsterdam.git>

You can create a developer or company account, but the credentials for admin are: '[admin@admin.com](mailto:admin@admin.com)' & 'admin' as password.

## 3. Navigation

The navigation for mobile and bigger screens are different.

### 3.1 Mobile

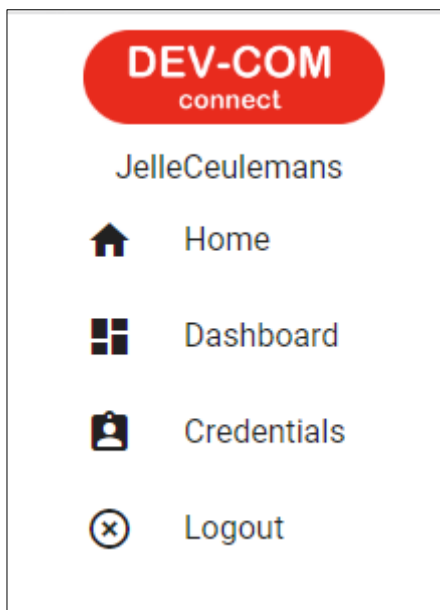

#### 3.1.1 Not Logged in

When a person is not logged in he has only three options: login, signup and home.

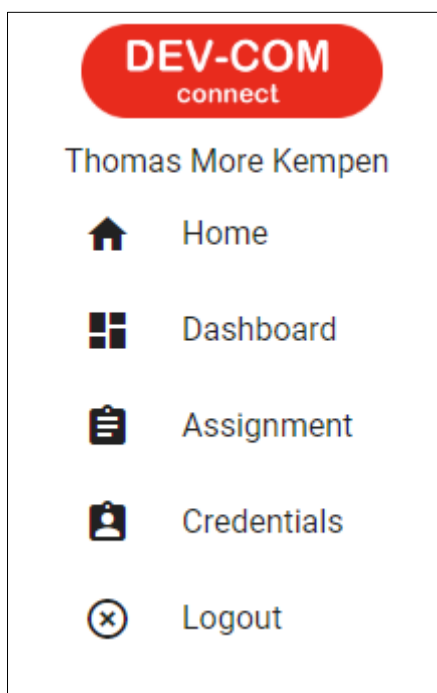

### 3.1.2 Logged in as developer

When a developer is logged in he has four options. Home, dashboard, credentials and logout.

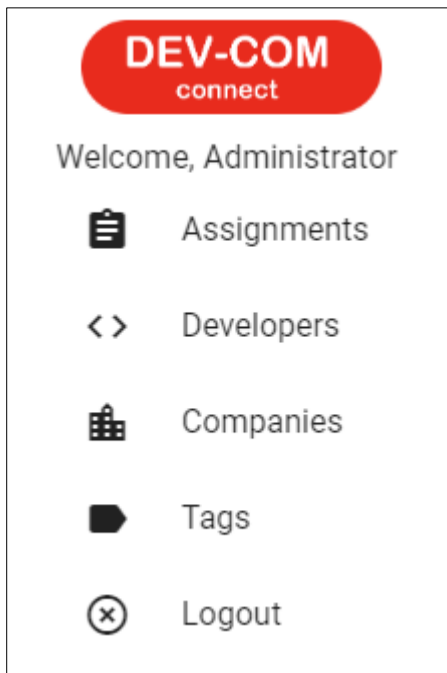

### 3.1.3 Logged in as company

When a company is logged in he has five options. Home, dashboard, assignments, credentials and logout.

### 3.1.4 Logged in as admin

## 3.2 Tablet and desktop

### 3.2.1 Not Logged in

### 3.2.2 Logged in as developer

### 3.2.3 Logged in as company

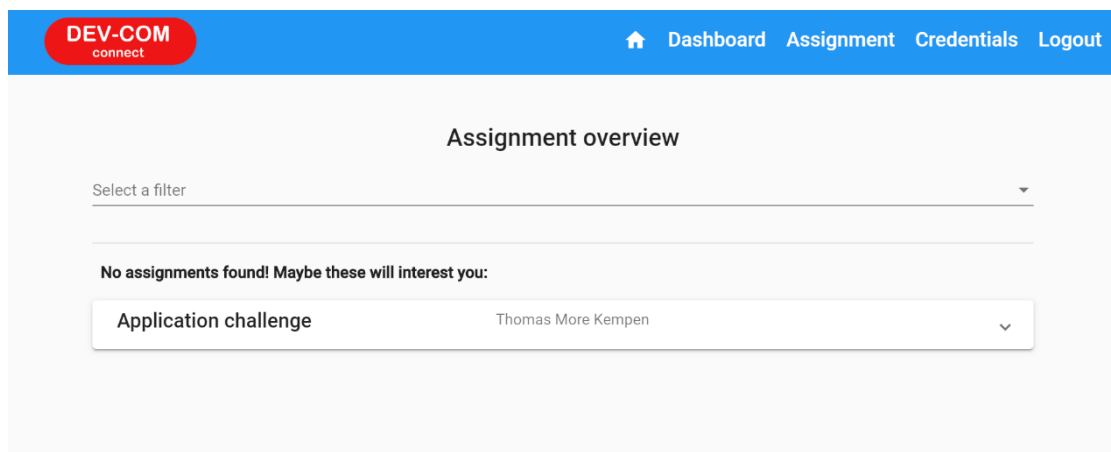

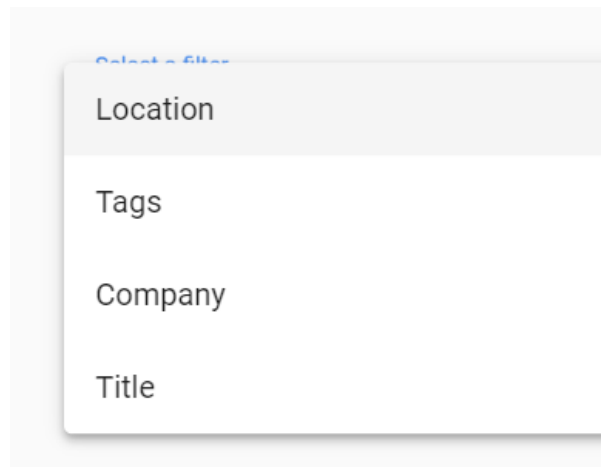

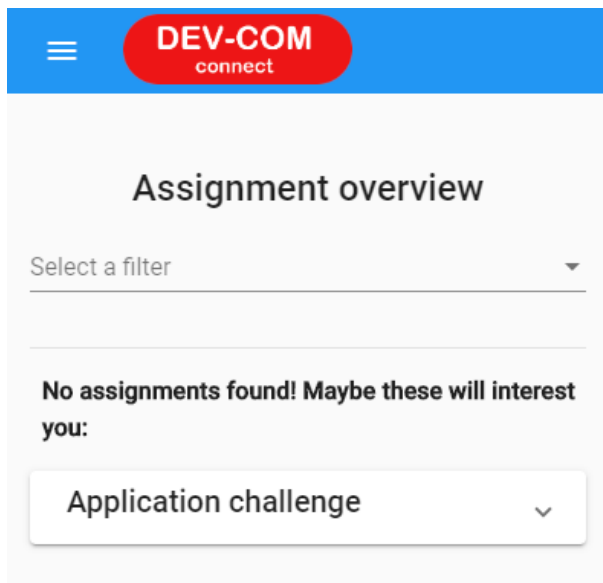

### 3.2.4 Logged in as admin

## 4. Overview (homepage)

The overview page is for every user available, logged in or not. On this page are all the assignments of the app visible. With the filtering it is easy to filter all the assignments. Location works with the zipcode, tags with skills (programming language most of the time), company on the company's name and title will filter the assignments by name.

When you open an assignment you can see the whole task. The info displayed is a title, company name, description, location, tags and optionally a pdf document.

If you are not logged and press on the apply now button you will be directed to the login screen, as a developer you will be applied (if you have filled in your credentials) and directed to your developer's dashboard and as company and admin you will see a message that this is only allowed for developers

## 5. Signup.

For new user they first of all need an account to start their new experience on DEV-COM connect. There are two types of account possible, a developer and a company account. The company is the user that is making the assignments and the developer is the one that is able to apply on the assignments.

Are you a developer or a company ?

☐ Developer

Email

The email field is required!

Password

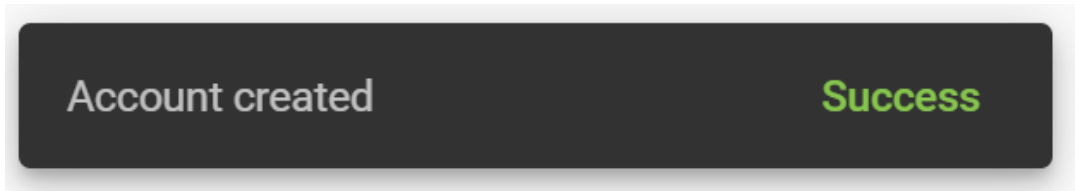

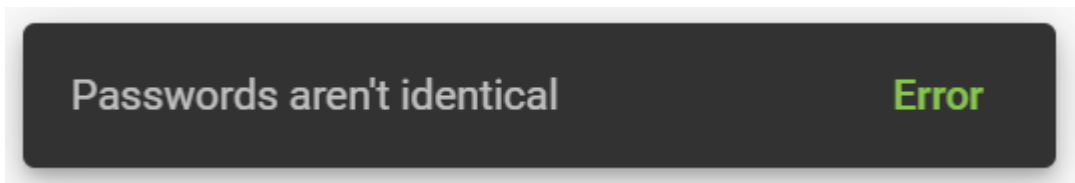

The password field is required!

Confirm Password

The confirm password field is required!

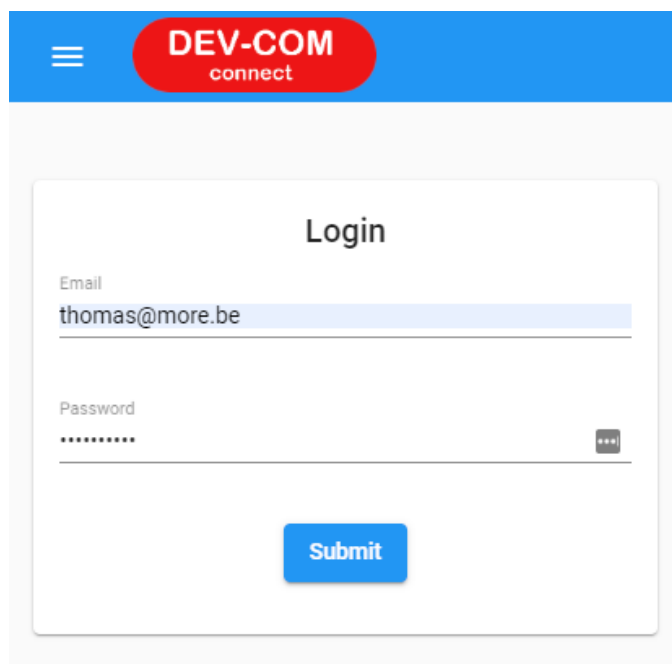

Also two messages are possible on this page, passwords aren't identical and when an account is successfully created.

## 6. Login

When the account is created we are now able to login and start the adventure.

The login form is part of a web application. At the top is a blue header bar with a white hamburger menu icon on the left and a red pill-shaped button with the text "DEV-COM connect" in white. Below the header is a white login box with a grey border. Inside the box, the title "Login" is centered at the top. Below the title are two input fields. The first is labeled "Email" and contains the text "thomas@more.be". The second is labeled "Password" and contains a series of dots, with a small eye icon to its right. At the bottom of the login box is a blue "Submit" button.

### Email

Email is required and need to be valid

### Password

password is required

## 7. Developer

These are all the available options to do as an developer accounts

### 7.1 Dashboard

When the developer is logged in he will be directed to his dashboard. On his dashboard are all the assignments visible that he applied to, accepted and denied from.

DEV-COM  
connect

Welcome, JelleCeulemans

[Home](#) [Dashboard](#) [Credentials](#) [Logout](#)

Applied assignments

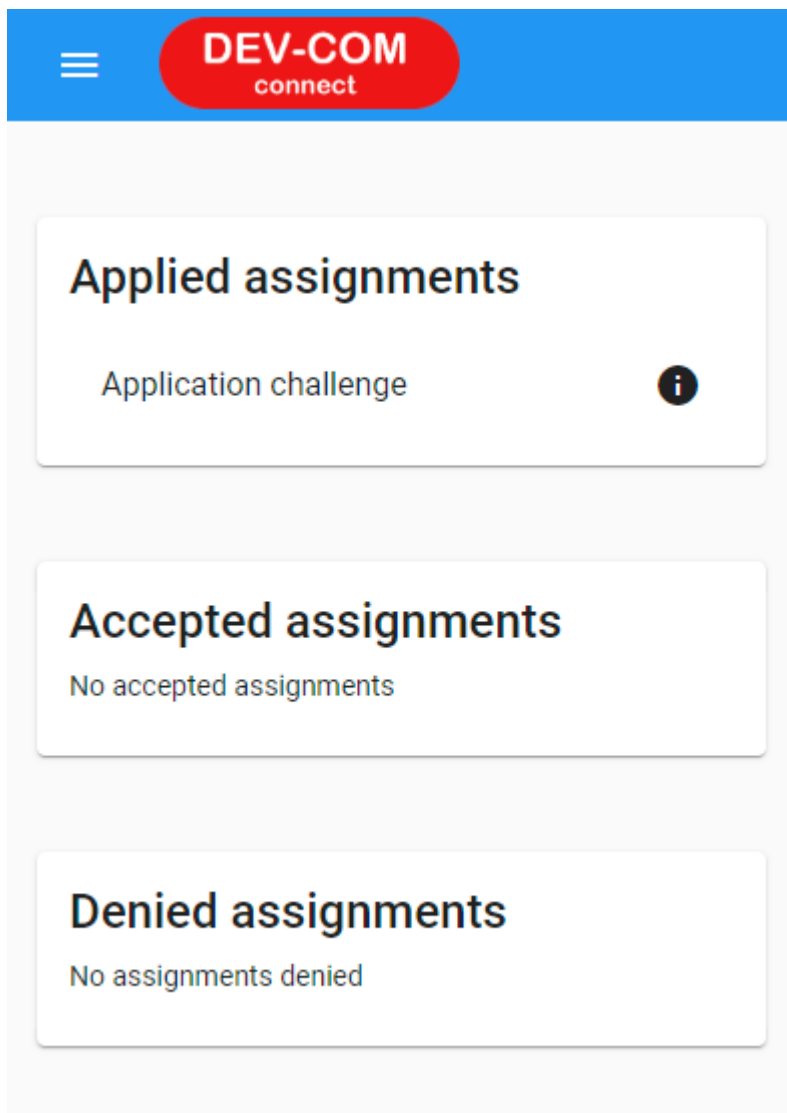

Application challenge

Accepted assignments

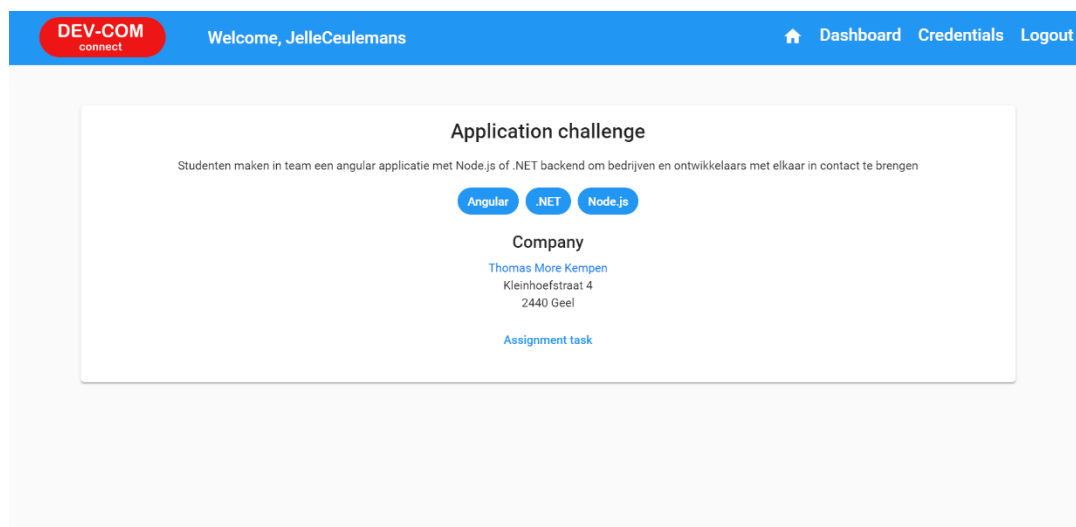

No accepted assignments

Denied assignments

No assignments denied

By following the Application Challenge link the developer can see all the available information. On this page are two more links on that will go to the more detailed information of the company and onz that will download (view in the browser) the attached pdf document.

After the developer is accepted to an assignment he can give a review to that company.

## 8. Company

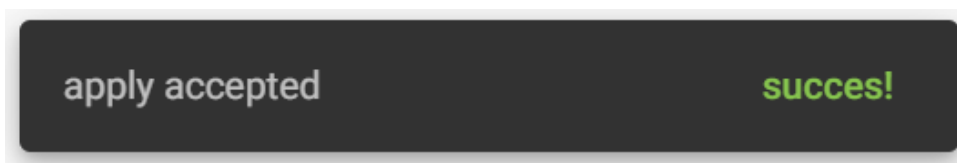

When a company is logged in to his account he has an overview of all his created assignments. When he opens one he can see the title, description and do some actions. The red bell indicates that someone applied to his assignment. He can open it by clicking on the view assignment button (the badge indicates how many applies). The delete button will permanently delete the assignment.

By following the view assignment button the company can see the full assignment and all the developers that applied and are accepted or denied. At the applies part the company can go to the developers profile, accept his apply or deny it.

When the company accept the apply.

The company can see the developers profile by clicking on the profile button. After the company accepted the developer he can give the developer a review

## 8.1 Assignment

A company first need to complete his credentials before he is able to create an assignment.

**First fill in your credentials!**

For creating an assessment the company has to fill in some information about that assignment. These information are a title, description, tags, optionally a pdf document and the location.

The screenshot shows the 'Assignment' form in the DEV-COM connect application. The header is blue with the 'DEV-COM connect' logo on the left and navigation links (Dashboard, Assignment, Credentials, Logout) on the right. The form itself is white and titled 'Assignment'. On the left side of the form, there is a vertical list of five steps: 1. Choose title, 2. Write Description, 3. Add tags, 4. Upload document, and 5. Location. Step 1 is highlighted with a blue circle and a blue dot. Below the steps, there is a text input field labeled 'Title'. At the bottom right of the form, there is a grey 'Submit Assignment' button.

This screenshot shows the 'Assignment' form after it has been completed. The header and navigation are the same as in the previous screenshot. The form is titled 'Assignment'. The vertical list of steps on the left now shows all five steps (1. Choose title, 2. Write Description, 3. Add tags, 4. Upload document, 5. Location) marked as completed with blue checkmarks inside blue circles. The 'Title' input field now contains the text 'Application Challenge'. At the bottom right, the 'Submit Assignment' button is now blue.
